

**ANGELOV, A.M. (2000): Catalogus Faunae Bulgaricae. 4. Mollusca: Gastropoda et Bivalvia aquae dulcis.** – Sofia (Pensoft Publishers) / Leiden (BACKHUYSEN Publishers): xiv + 57 pp. (ISBN 954-642-108(4) and ISBN 90-5782-078-1). Copies can be ordered by BACKHUYSEN Publishers B.V., P.O. Box 321, 2300 AH Leiden, The Netherlands. E-mail: backhuys@backhuys.com

> The present work summarises data on the species composition and distribution of freshwater molluscs (gastropods and bivalves) in Bulgaria. This was done on the basis of both critical surveys of publications by other scientists and the research carried out by the author in the period 1950-1999. Information about 89 species belonging to 45 genera is given.

**BAUER, G. & K. WÄCHTLER (eds.) (2000): Ecology and evolution of the freshwater mussels Unionoida.** – Ecological Series, vol. 145: XXII + 394 pp. Berlin (SPRINGER-Verlag). (ISBN 3-540-67268-0)

> The volume describes and

explains the characteristics and life histories of the naiads, the interactions with their hosts, and their evolution. It elucidates the manifold implications of their presence or absence in a lake or stream. Further, aspects of nature conservation are covered, as many naiad species are seriously threatened. Some have been used successfully as sensitive pollutant indicators in habitat monitoring and as 'archives' for environmental changes. The book contains 22 chapters written by various authors. They are: G. BAUER: Characterization of the Unionoidea (= naiads), pp. 3-4; K.F. WALKER, M. BYRNE, C.W. HICKEY & D.S. ROPER: Freshwater mussels (Hyriidae) of Australia, pp. 5-31; D.G. SMITH: Systematics and distribution of the recent Margaritiferidae, pp. 33-49; K.-O. NAGEL & G. BADINO: Population genetics and systematics of European Unionoidea, pp. 51-80; G. BAUER: Life-history variation on different taxonomic levels of naiads, pp. 83-91; K. WÄCHTLER, M.C. DREHER-MANSUR & T. RICHTER: Larval types and early postlarval biology in naiads (Unionoidea), pp. 93-125; S. HOCHWALD: Plasticity of life-history traits in *Unio crassus*, pp. 127-141; R. ARAUJO & M.A. RAMOS: Life-history data on the virtually unknown *Margaritifera auricularia*, pp. 143-152; G. BAUER: Factors affecting naiad occurrence and abundance, pp. 155-162; E. ZAHNER-MEIKE & J.M. HANSON: Effect of muskrat predation on naiads, pp. 163-184; W. JANSEN, G. BAUER & E. ZAHNER-MEIKE: Glochidial mortality in freshwater mussels, pp. 185-211; D.J. HORNBACH: Macrohabitat factors influencing the distribution of naiads in the St. Croix River, Minnesota and Wisconsin, USA, pp. 213-230; G. BAUER: Framework and driving forces for the evolution of naiad life histo-
